10. One of the most valuable things in the world is the  
coin from the Chinese Government in the year of 1911. It is  
now almost impossible to find one in the market. It is  
not the value but the history of the coin that makes it  
valuable. It is a good example of the art of the Chinese  
coin maker. It is about 35 in. in diameter and is  
much better than the others. It is a very rare coin and is  
worth more than the others.
